We get to hotel on Sunday and on-site Monday. The Ludlum 2241 is being shipped by Dave to my hotel. You are obviously welcome at the site anytime. Even if it is just to conduct other work from the trailer. However, your backpack idea with the probe is something I was hoping to figure out Monday/Tuesday while we are warming up HPGe. We need to scan the

one section of NFB Area 5 (post excavation that needs to be backfilled). We should scan the northern end of Area 7 as well (we had obstruction there when you surveyed). For HTC we need to finish Area 1 northern half. Overall, during the test pit excavation, your real time input would be helpful as well. Again, it depends on what your schedule looks like.

Thanks

Hey Eric,

Yeah, I was going to give you a call. I was planning to shoot up there for a day or so depending on the need. Are you guys mobilizing on Sunday or Monday?

Thanks Pete. So, what will be your availability next week? Will you be able to come to the site?

Frank is incorrect. GES had procured them prior to Frank arriving on-site. I remembered thinking it was odd that GES was ordering them, thought that would have fallen under a Weston task.

I just spoke to Kevin Shaver about the Morgan Site and refreshed his memory on the NFB jars. He is looking it up.

Hi Pete. Frank thinks you ordered the jars. I thought the same thing. Who do we contact to figure that out?

As far as I know, we had been using the jars that GES had procured.

Hi Dave. Thanks. Do you have the address for the site?

Initially we ordered jars on our own as per your specifications. Then we got jars from Pace Lab if I recall. Pete, can you give more information?

Regards,

Eric

Eric,

Did you or Pete order the last batch of the plastic jars that were being used for the soil gamma analyses.? Can you let Chad know?

I just looked and the instrument is back from calibration. I will check it out today/tomorrow and probably ship it directly to the site.

Dave

**Subject:** HPGE 16-ounce Jars

Hi Dave –

Can you please give me a description of the 16-ounce jars we ended up using for the

majority of the of NFB. They were the poly jars with the black lid and a silver cover under the lid. We are trying to order more, but I am having a problem identifying who ordered the last batch.

Thank You

Chad
